UI SPECIFICATION · VERSION 1.0

shiply

Shiply UI Specification

Everything needed to apply the Shiply brand to the merchant dashboard, the courier app and the website: colors in light and dark, fonts, type scale, spacing, components, icons, logos, app icons and the rules that keep them consistent.

00 What's in this package

FOLDER	CONTENTS	USE FOR
`tokens/css`	CSS variables, light and dark, plus @font-face	Web dashboard and website
`tokens/tailwind`	Tailwind preset reading the CSS variables	Tailwind projects
`tokens/json`	All tokens with usage notes	Any platform, Figma Tokens, scripts
`tokens/flutter`	Dart color classes and ThemeData for light and dark	Flutter apps
`tokens/android`	colors.xml for values and values-night	Native Android
`tokens/ios`	SwiftUI colors that switch with dark mode	Native iOS
`fonts`	Plus Jakarta Sans (TTF and WOFF2), IBM Plex Sans Arabic (TTF), license	All platforms
`icons`	34 icons as SVG: outline, selected, currentColor, and one sprite file	All platforms
`logo`	Horizontal, stacked and icon logos, 4 colorways, SVG and PNG, letters outlined	Headers, login, emails, PDFs
`app-icon`	iOS 1024, Android adaptive, Play Store, favicons, PWA icons	Store listings, browsers

The four rules that matter most

1. Sky is a fill, never text. Shiply Sky #59CBE8 has about 1.9 to 1 contrast on white. Use it only for backgrounds and fills. Never for text, thin lines or outline icons on white. Text on Sky is Navy or Blue.

2. Status = color + icon + label. Every order status always shows its color, its own icon and its label together. Never color alone. In sunlight, violet and magenta look alike; the icon is what couriers read.

3. Wallet colors stay in the wallet. COD cash (teal) and driver points (sun yellow) appear only in wallet cards, balances and transactions. Never in status chips.

4. One Blue button per screen. The primary action is Shiply Blue with white text. Everything else is secondary or outline.

01 Color

Brand colors

NAME	HEX	RGB	PANTONE	USE
Shiply Blue	`#0047BB`	0 71 187	2728 C	Main brand color. Logo, primary buttons, links, selected states.
Shiply Sky	`#59CBE8`	89 203 232	2985 C	Second color. Fills and backgrounds only, never text or thin lines on white.
Shiply Navy	`#13294B`	19 41 75	2767 C	Text and icons.
Shiply White	`#FFFFFF`	255 255 255	Paper white	Space and text on Shiply Blue.

UI roles, light and dark

Build screens with these role tokens, not raw hex values, so dark mode works by switching one set.

TOKEN	LIGHT	DARK	USE
`bg`	`#F3F6FA`	`#0B1424`	App background
`surface`	`#FFFFFF`	`#111E33`	Cards, sheets, sidebar
`surface-raised`	`#F3F6FA`	`#18273F`	Hover rows, inputs, nested panels
`line`	`#DFE5EE`	`#24344F`	Borders and dividers
`text`	`#13294B`	`#E7EDF7`	Body text, headings, icons
`text-muted`	`#5B6B82`	`#93A3BC`	Secondary text, captions, placeholders
`primary`	`#0047BB`	`#2F6BFF`	Primary button background
`on-primary`	`#FFFFFF`	`#FFFFFF`	Text and icons on primary
`primary-pressed`	`#003C9D`	`#255BE0`	Primary button pressed
`link`	`#0047BB`	`#5B8CFF`	Links, selected nav text and icon lines
`selected-bg`	`#E6F6FB`	`#18273F`	Selected nav item, selected tab, secondary button
`sky`	`#59CBE8`	`#59CBE8`	Sky fills: selected icon fill, lid bands, illustrations
`focus`	`#59CBE8`	`#59CBE8`	Focus ring, 2px outside the element
`danger`	`#DC2626`	`#F87171`	Destructive actions and errors

02 Order status

Six statuses. Each has a fixed color for light and dark, a fixed icon and fixed labels in English and Arabic. Chips use a 14% tint of the status color as background, the icon in the status color and the label in the text color.

STATUS	ARABIC	ICON FILE	LIGHT	DARK	CHIP
New `new`	جديد	`new.svg`	`#64748B`	`#94A3B8`	New
In progress `in-progress`	جاري التجهيز	`schedule.svg`	`#7C3AED`	`#A78BFA`	In progress
Heading to customer `heading-to-customer`	في الطريق للعميل	`courier.svg`	`#C026D3`	`#E879F9`	Heading to customer
Delivered `delivered`	اتسلم	`delivered.svg`	`#16A34A`	`#4ADE80`	Delivered
Needs action `needs-action`	محتاج إجراء	`alert.svg`	`#D97706`	`#FB923C`	Needs action
Returning `returning`	راجع لك	`returns.svg`	`#DC2626`	`#F87171`	Returning

Dashboard stat cards

White card, 1px line border, radius 12, a 4px strip at the top in the status color, label in `text-muted`, number in `number-lg`. Needs action numbers also take the status color.

Wallet colors

WALLET	ICON	BASE	TINT (CARD BACKGROUND)	TEXT ON TINT	DARK MODE
COD cash `cash`	`cash.svg`	`#0E9384`	`#E1F5F2`	`#0B5F57`	`#2DD4BF`
Driver points `points`	`points.svg`	`#FFC21A`	`#FFF6D6`	`#7A5200`	`#FFD34D`

COD cash

EGP 9,116.60

Driver points

2,340 pts

Points base yellow never carries white text (use Navy or the ink color). Cash base teal is for icons, bars and large numbers only; body text on white uses the ink color.

03 Typography

Latin: Plus Jakarta Sans, weights 400, 500, 600, 700, 800. **Arabic:** IBM Plex Sans Arabic, weights 400, 500, 600, 700. Both are in `/fonts` and free (SIL Open Font License). Fallback: `system-ui, -apple-system, "Segoe UI", Roboto, sans-serif`.

TOKEN	WEB	MOBILE	LINE HEIGHT	WEIGHT	TRACKING	USE
`display`	56 px	40 sp/pt	1.05	800	-0.035 em	Marketing heroes, splash
`h1`	40 px	32 sp/pt	1.1	800	-0.03 em	Page titles on the website
`h2`	28 px	24 sp/pt	1.2	700	-0.02 em	Dashboard page titles
`h3`	20 px	18 sp/pt	1.35	700	-0.01 em	Card and section titles
`body-lg`	18 px	17 sp/pt	1.6	400	0 em	Intro text
`body`	16 px	16 sp/pt	1.6	400	0 em	Default text
`body-sm`	14 px	14 sp/pt	1.5	400	0 em	Tables, dense lists
`caption`	13 px	12 sp/pt	1.4	500	0 em	Timestamps, helper text
`label`	12 px	11 sp/pt	1.3	700	0.06 em	Overlines, table headers (uppercase)
`number-lg`	28 px	24 sp/pt	1.1	800	-0.01 em	Stat cards, wallet balance (tabular numbers)

- Numbers in tables, amounts and stat cards use tabular figures (`font-variant-numeric: tabular-nums`).
- Money format: `EGP 1,240.00` in English, ١٬٢٤٠ جنيه or 1,240 جنيه in Arabic, the same choice everywhere.
- Arabic text uses the same sizes; increase line height by 0.1 for body text.
- Sentence case for buttons and titles ("Create order", not "CREATE ORDER"). Uppercase only for the `label` style.

SAMPLE

Today's summary

Your courier picks up between 10:00 and 13:00.

04 Layout, spacing, radius, elevation

SPACING SCALE (PX)	0, 4, 8, 12, 16, 20, 24, 32, 40, 48, 64
RADIUS	`sm` 6 · `md` 10 · `lg` 16 · `xl` 24 · `pill` 999 (sm: chips inner, inputs small · md: buttons, inputs · lg: cards · xl: sheets, modals · pill: status chips, tabs)
SHADOW SM	`0 1px 2px rgba(19,41,75,.06), 0 1px 1px rgba(19,41,75,.04)`
SHADOW MD	`0 6px 16px rgba(19,41,75,.10)`
SHADOW LG	`0 16px 32px rgba(19,41,75,.16)`
GRID	Dashboard: 232 px sidebar, content max 1280 px, 24 px gutters. Mobile: 16 px side margins, 8 px grid.
TOUCH TARGETS	Minimum 44 x 44 px for anything tappable, 48 px for primary actions in the courier app.
BORDERS	1 px `line` . Cards use border, not shadow. Shadows only for floating items (menus, toasts, modals).

05 Components

Buttons

TYPE	LOOK	SPEC
Primary	Create order	bg `primary`, text `on-primary`, pressed `primary-pressed`. Height 40 (web) / 48 (app), radius 10, padding 16, 700 weight. One per screen.
Secondary	Track parcel	bg `selected-bg`, text `link`.
Outline	Cancel	bg `surface`, 1px `line`, text `text`.
Destructive	Delete order	bg `danger`, white text. Always confirm first.
Disabled	Create order	bg `#E3E8EF`, text `#9AA6B8`, no shadow.

Navigation

SIDEBAR ITEM

Home

Orders

Idle: `text`, outline icon. Selected: `selected-bg`, `link` text, selected icon (Blue line, Sky fill), 4px Blue bar on the left edge.

BOTTOM TAB (APP)

Home Orders Wallet More

Selected tab: pill 52 x 28 behind the icon, selected icon, label in `text`.

Alerts, inputs, toasts

NEEDS ACTION ALERT

2 orders need your action
Confirm the address before 6 PM.

Never use brand Blue or Sky for warnings. Errors use `danger` with the same layout.

INPUT

Customer phone

01X XXXX XXXX

0100 123 4567

Height 40, radius 10, 1px `line`. Focus: 2px `focus` ring. Error: 1px `danger` plus message below in `danger`.

06 Icons

24 x 24 grid, 1.75 px stroke, round caps and joins. Use `outline` for idle and `selected` for active. In code use the `currentColor` set or the sprite, and fill `.shiply-fill` with Sky at 55% for the selected state. Sizes: 20 in dense tables, 24 default, 28 in the courier app. Arrow icons (returns, payout, route) mirror in Arabic RTL; all others stay as they are.

 Home `home.svg`	 Orders `orders.svg`	 Create order `create.svg`	 Pickups `pickups.svg`	 Courier `courier.svg`	 Tracking `tracking.svg`

07 Logo and app icons in the product

HEADER LOGO

Dashboard header and login: `logo-horizontal-primary.svg`, 28 px tall. On Blue or in dark mode: `logo-horizontal-reverse.svg`. Never below 24 px tall; below that use the icon.

APP ICON

iOS: `app-icon/ios/AppIcon-1024.png` (square, iOS rounds it). Android adaptive: foreground from `app-icon/android`, background color `#0047BB`. Web: `favicon.svg` plus PNG sizes, theme color `#0047BB`.

Don't

- Recolor, stretch, rotate or add effects to the logo.
- Retype "shiply" in a font; always use the files.
- Place the primary logo on Blue or dark backgrounds; use the reverse version.

08 Dark mode, Arabic and accessibility

Dark mode

- Switch the role tokens (light to dark column). Brand Blue #0047BB is too dark on Navy, so dark mode uses `#2F6BFF` for buttons and `#5B8CFF` for links and selected states.
- Sky stays #59CBE8. Status and wallet colors use their lighter dark values. Tints become 12 to 14% of the color over the surface.
- Follow the device setting by default, with a manual switch in settings (Light, Dark, System).

Arabic and RTL

- Set `dir="rtl"` and mirror the whole layout: sidebar on the right, back arrows point right, progress fills from right to left.
- Keep numbers, order IDs (SHP 1048 8203 77), phone numbers and amounts left to right inside RTL text.
- Arabic labels for statuses are in section 02. Use simple Egyptian Arabic, as in the brand book.

Accessibility

- Body text at least 4.5 to 1 contrast, large text and icons at least 3 to 1. All role pairs in this spec pass.
- Never communicate with color alone (status rule). Focus ring always visible on keyboard focus.
- Minimum text size 12 px on web, 11 sp in apps.

09 Change checklist

The list of edits to bring the current system in line with the brand.

1. Install the fonts and set Plus Jakarta Sans as the default UI font, IBM Plex Sans Arabic for Arabic.
2. Import the tokens for your platform and replace hard-coded colors with role tokens.
3. Replace the logo in headers, login, emails and PDFs with the files in `/logo`.
4. Update app icons, favicon and store listings from `/app-icon`.
5. Replace UI icons with the Shiply set; apply the selected state in navigation and tabs.
6. Map every order status to the new color, icon and label (section 02). Show all three in chips and filters.
7. Restyle stat cards with the 4px status strip.
8. Add the wallet colors to COD cash and driver points cards and transactions.
9. Restyle buttons, inputs, alerts and navigation per section 05. One primary button per screen.
10. Add dark mode with a Light, Dark, System switch.
11. Check every screen in Arabic RTL.
12. Run a contrast check: no Sky text or thin Sky lines on white anywhere.
